TY517 MC2

DRIVE AXLE

There's power in these drive axle tires—maximum power. The popular TY517 drive tire delivers outstanding traction, long even wear and superior durability. Featuring our STEM-2 technology which enables this tough performer to stand up to your jobs' destructive forces, allowing for multiple retreads and lower maintenance costs.

28/32" Original Tread Depth delivers long wear and road-grabbing power for the long haul without any compromises in traction.

Three Large Circumferential Grooves are extra wide, self-cleaning and V-shaped for improved water dispersion, lateral stability and long, even wear.

Solid Outer Shoulder block contributes to flat, even wear on all types of 2- and 3-axle tractors and trucks.

Advanced Rubber Compound reduces heat, provides longer wear and reduces rolling resistance, all resulting in lower fuel consumption.

Tapered Center Groove promotes stone ejection and reduces tread-stone damage for enhanced casing life and retreadability.
