

An All Position tire for city bus operation that delivers long mileage and low cost per kilometre.

The RY537 All Position tire delivers outstanding handling and stability, long even wear and superior durability.

Proven technology enables this tough performer to stand up to destructive forces experienced in urban bus transport applications providing countless kilometres of trouble free operation.

LONGEVITY

Sidewall Protection helps resist cuts, snags, and damage resulting from contact with curbs and obstacles often experienced in local urban bus route operations.

Extra Wide Tread Design providing a large footprint contact area for increased stability and handling.

EFFICIENCY

Extra Deep Tread Design allows for improved mileage and reduced cost per kilometre in high-abrasion-wear application.

DEPENDABILITY

Continuous Shoulder Ribs helps provide stability and accurate steering response while helping to resist irregular wear and tearing often experienced in urban haul applications.
